## Teacher Tech Tip

Start the school year off right! While most save in 'My Documents' or on the 'school server', consider saving in one more place. As the oceanfront often loses power, you should save your important 'I-can't-live-without' documents on a removable device (e.g. - flash drive).

Reminder! Don't forget to **log out** after a computer session. Keep sensitive documents and data private and keep children from staff Internet privileges!

Looking for a specific text in a Word document or on a web page? Try this: Hold down the control key on the keyboard, then press the "F" key. Type in the word you are looking for, then press 'Search' (Mac) or 'Find' (Windows).
